

Recycle Endulastic®

Recycle Endulastic® is elastic fabrics by Essence with two way stretch. A cutting edge new technology of compound spinning is applied to the fiber. A dominant Chlorine-Resistant performance is assured by the 100% polyester composition. UPF 50+ property protects the wearer from the damaging of the sun in the highest level. Recycle Endulastic® by Essence is the most enduring stretch fabric perfect for any type of sports not only in the water also on land and even most extreme sports .

Recycle Endulastic® has much better shape retention than traditional spandex stretch fabric. The stretch of traditional spandex fabric is degraded through time and getting loser and loser. Recycle Endulastic®'s everlasting stretch provides highly level of shape retention.

30% of waste water and energy saved during the manufacture process compares to the traditional spandex stretch fabric. 100% polyester single composition makes the fabric much easy to recycle. Recycling the fabric is just as easy as recycling PET bottles. Let's work together for a better tomorrow.
