

## Membrane Performance

### Stretchable

Our membrane is really stretchy. Therefore it is possible to manufacture a product that offers the wearer maximum comfort and good fit.

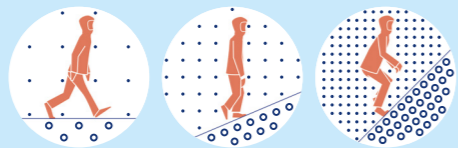

### Poreless

Our hydrophilic molecular based membrane with no pores won't get clogged over time. Thus, the breathability of our membrane is maintained for a long time.

### Waterproof

The dynamic test simulates walking and thus realistically checks the level of waterproofness of the shoe to see whether water penetrates.

### Breathable

The hydrophilic molecular chains dissipate the water vapor to the outside. The rate of water vapor transmission increases relative to physical activity.

### Cleaning

- Shoes should be cleaned from the outside with a soft brush and lukewarm water to maintain the breathability

### Drying

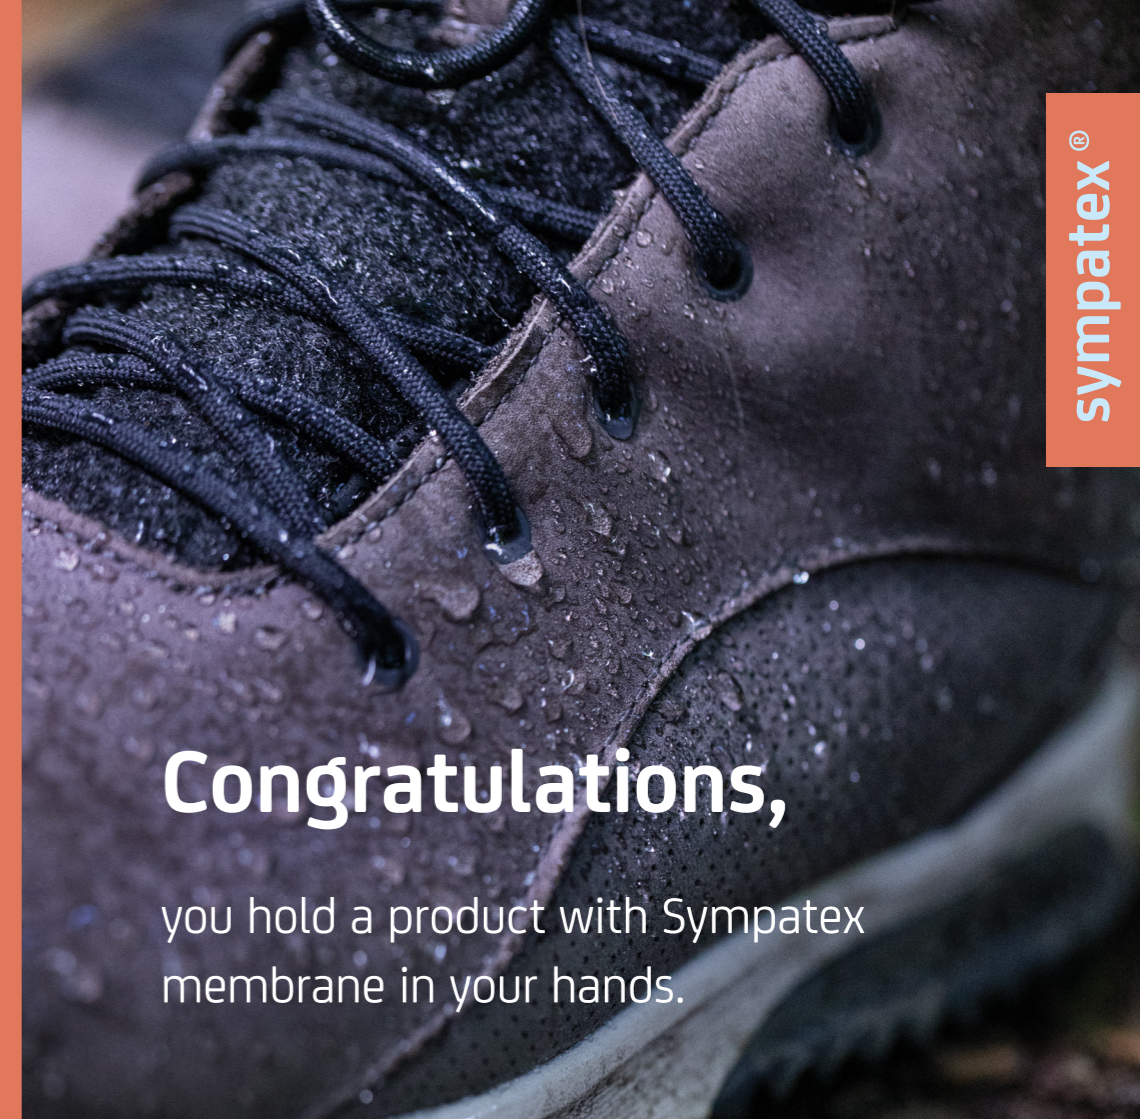

- Dry shoes slowly and never place them in direct sunlight or on radiators

### Impregnation

- Regular reimpregnation maintains protection against dirt and supports the water beading effect
- Avoid extremely oil-based creams so as not to impair breathability
- Suitable care products for shoes with Sympatex membrane are available at your shoe retailer

sympatex®

**Congratulations,**  
you hold a product with Sympatex  
membrane in your hands.

Re>Think Performance.  
Together.

We have the highest demands on our shoes. They are designed to keep the feet dry and regulate the temperature and humidity. Sympatex offers a membrane that provides optimal comfort in any weather and activity.

**The sustainable approach**  
to a highly functional yet fully  
recyclable membrane.

### Top Performance

- Compact hydrophilic, poreless
- 100% waterproof
- Optimal dynamic breathability
- Extremely stretchy (wearer comfort)

### We take responsibility

- 100% Climate neutral
- 100% Recyclable
- PFAS-free
- Reduced carbon footprint thanks to >25% bio based content

### Full Transparency

As a company that considers sustainability to be part of its DNA, it is extremely important for us to have our efforts constantly checked and certified.

This way we can offer our customers more transparency and security.

STANDARD 100

Maximize sustainability.  
Everyday a step.  
Together.

We are on a mission to reduce our environmental impact, so we are constantly working on reducing our CO2 emissions and we compensate for our carbon footprint. We'd never compromise on quality; you can rest assured that our PFAS-free performance materials are always at the top! Our laminates are designed to respect the environment while providing durability and comfort for the wearer.
