

BIO-TEX SHIELD™

WATERPROOF & BREATHABLE MEMBRANE

POWERED BY **BIO-ALLOY™**

ONE LESS LAYER ELIMINATES CREATIVE CONSTRAINTS WITHOUT SACRIFICING PERFORMANCE

This unique innovation brings a high performance bio-based waterproof breathable membrane that offers protection from the elements, for adventurous living.

Reduced material input offered by extreme durability enables performance by using just one layer of textile, creating thinner and lightweight textiles that expands design and creativity options.

Powered by **Bio-Alloy™**, Modern Meadow's revolutionary miscible blend of plant-based protein and biopolymer is created to maximize performance and sustainability at the molecular level.

UNIQUENESS

High abrasion resistance allows for 2-layer system and eliminates the need for 3 layers

Lightweight for comfort and creative freedom

Dyeable with enhanced color spectrum

High bio-renewable content (>60%)

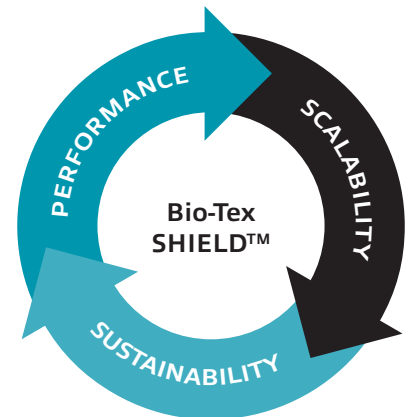

No solvents

No PFAS

PERFORMANCE

- High breathability
- Waterproof
- Windproof
- Durability provides longer garment life
