

PASSION, EXPERTISE, CREATION

ABOUT US

VERTIGO is located in the North East of Italy, the epicenter of the so-called "cycling district" and it manufactures premium quality Sportswear.

We are specialist in creating, developing and manufacturing technical cycle clothing to the highest possible standards.

We also have an extensive experience in producing active wear for running and skiing among few other sports.

EXCLUSIVE PRODUCTION

Producing exclusively for third parties, Vertigo is able to cater for small brands and small clubs as well as large corporations. With low minimum quantities of just 10 pieces, lead times of 8 weeks, there's little or no barrier to realising your vision quickly.

STYLES AND PATTERNS

Our main focus is creating the product, making styles and patterns as to ensure that your clothing has the perfect fit, perfect choice of materials and the best feel.

Whilst our stylist makes patterns, our graphic team creates artworks, and our production facility follows the whole production process step by step to assure you a rigorous level of quality control.

**ADVANCED ITALIAN
ACTIVEWEAR**

Specialist in creating, developing, and manufacturing technical cycle clothing.

MADE IN ITALY

All our fabrics and accessories are sourced in Italy. By choosing us, your brand too can benefit from the best raw materials ever.

Specialist in creating, developing, and manufacturing technical cycle clothing.

We are passionate about creating products that are tailored to your individual needs and, with our manufacturing expertise, you can get the highest quality technical clothing you can think of.

To bring your idea to life, start by having a look at our website, providing insight and details on Vertigo's available range of custom apparel.
