

Bac-Pure[®]
Antimicrobial
by Smart Innovation[®]

**BE ACTIVE.
STAY FRESH.**

ODOUR-CONTROL TECHNOLOGY

Hygiene is a major concern in all areas of our everyday life. Physical activities lead to sweat, heat and humidity, making it easier for microbes to grow in ever-increasing numbers. During use, textiles can develop unpleasant smells that originate from different sources, both from the human body and its surroundings. Microbes can damage everyday products, causing stains, odours and product deterioration.

Some products are not always effective in removing bad odours. Applying an antimicrobial to a textile is seen as the ideal solution for controlling and eliminating microbes, and Si Bac-Pure[®] is what you need.

4-IN-1 ANTIMICROBIAL PROTECTION

Si Bac-Pure[®] is a sustainable functional finish with antimicrobial properties. When applied to textiles, it will inhibit the growth of bacteria, virus and fungus. In addition, it will eliminate unpleasant smells and will ensure around-the-clock freshness and comfort.

Now, you can enjoy all of your activities without a single worry, knowing that your textiles will protect you anywhere and everywhere, even after intensive use.

100% ANTIBACTERIAL
99.98% ANTIVIRAL

HIGH EFFICACY

**LIFETIME-ACTIVE
FINISH**

SUSTAINABLE

**HYGIENE AND
FRESHNESS**

ODOURLESS

WHY Si Bac-Pure[®]?

- Antiviral, antibacterial, antifungal.
- Keeps textiles decontaminated and odour-free.
- Easy to apply and cost-effective.
- Sustainable, high efficacy and long durability.
- Prevention of cross-contamination and infections.

Effective against:

Virus

Bacteria

Fungus
