# MANIFESTO

## THE LAST DETAIL

There is a force that holds together our people, products, company and identity.

An elastic force.

Capable of extending on garments as well as on markets.

Able to wrap and tighten on the body, as to speed the delivery times.

A force that can adapt and sustain, in case of mechanical stress or specific demands.

To refine and appreciate each garment as well as our clients.

Finally, to renew the production cycle and the supply chain, from a circular perspective, respecting the environment.

That's why we don't just make ribbons but we use our force to make every item, the perfect product.

We are MARC and our force is able to make a difference, down to the last detail.

THE LAST DETAIL.

DETAIL

# ABOUT

# MARC

6

## THE PASSION WE EXPORT ALL OVER THE WORLD

We are a company with over 30 years of experience. We design and create high-performance tapes, ribbons, fabrics with silicone for the sportswear, fashion and workwear sectors.

Our specialized knowledge of materials, production processes and technical performances allows us to develop innovative products that we export all over the world.

Marc is not only a supplier who meets your needs, but also the partner that offers solutions. The technical know-how and the search for the perfect product are the focus of everything we do.

FROM THE RAW MATERIAL TO THE PRODUCTION OF THE PRODUCT. WE ARE SUPPLIERS, PRODUCERS BUT ESPECIALLY **PARTNERS.**

7

UNITED STATES

COLUMBIA

ITALY

CZECH REPUBLIC

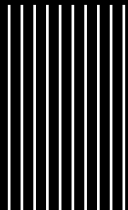

CHINA

**2** PRODUCTION **SITES**: EUROPE AND ASIA

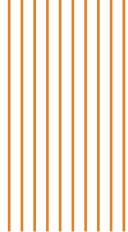

**3** INTERNATIONAL **DISTRIBUTORS**

DYNAMIC AREA MANAGERS ACTIVE IN OVER **63 COUNTRIES**

MORE THAN **90 VISITS EVERY YEAR** AT OUR HEADQUARTERS

STRENGTHS

# GREAT PRODUCTION CAPACITY.

10

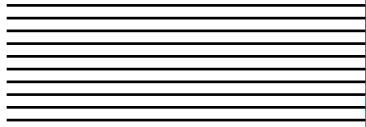

OVER **7000MQ** OF PRODUCTION SURFACE

MORE THAN **150 MACHINES**

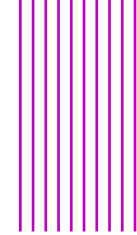

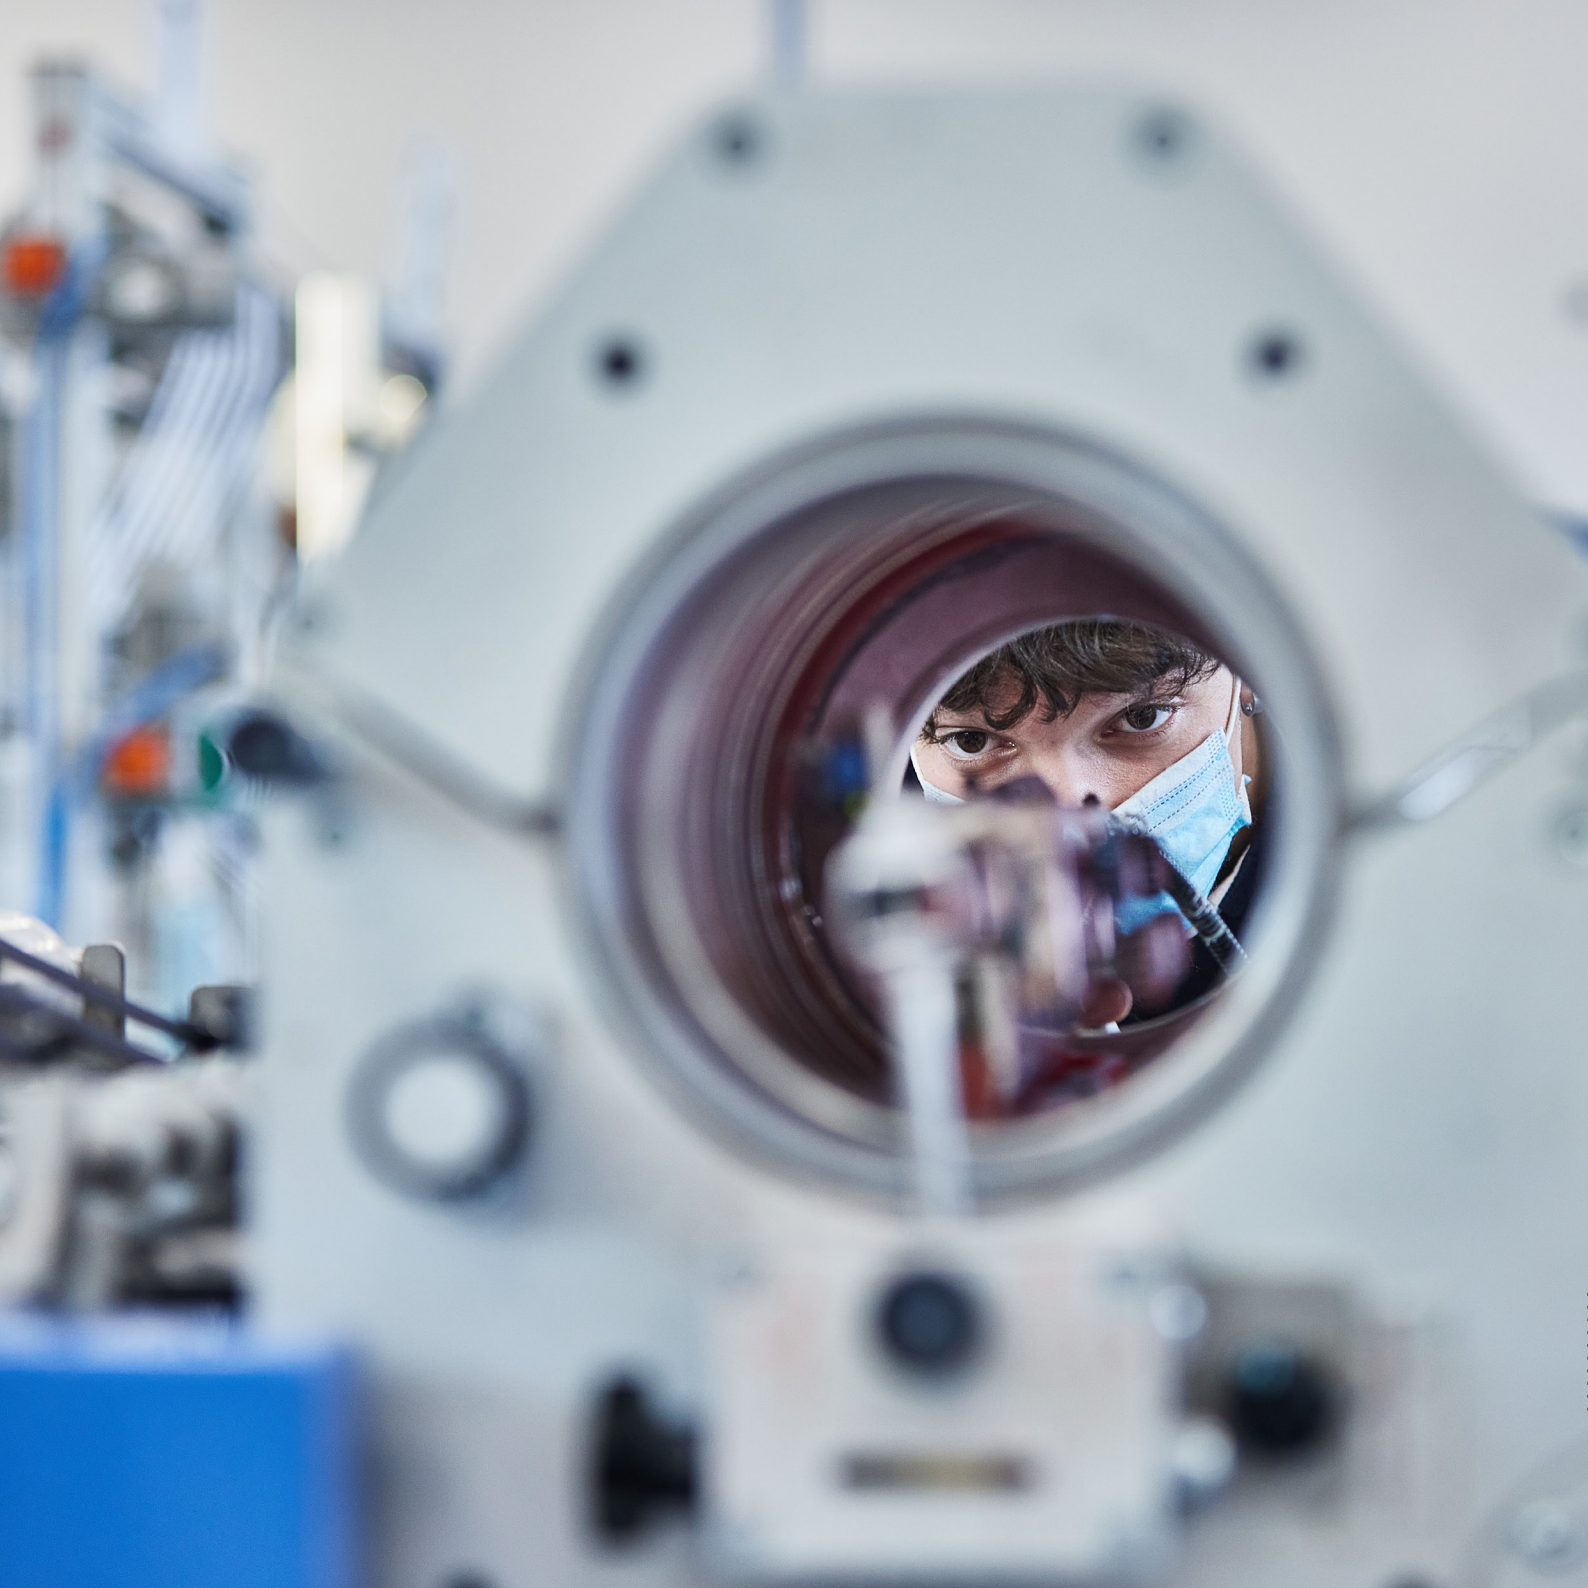

WE PRODUCE OVER **3 MILLION** METERS PER MONTH

We are a dynamic reality in constant growth. Significant investments in technologies, machineries and human resources allowed us to become a consolidated reality, also on the international scene.

We are able to satisfy all your needs, offering custom solutions for niche requests and promptly responding to large volumes requests thanks to our flexible management of the production process.

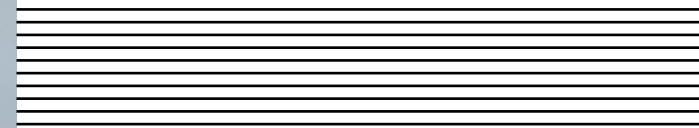

STRENGTHS

## PROCESS CONTROL.

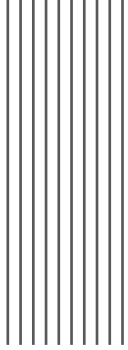

Investment in the latest technologies enables the digital control of the entire production process. The path that leads to the production of our products starts with the study of the ergonomics of the garment in order to create high-performance products with great aesthetics. Thanks to the use of the best technologies in the hands of our craftsmen, we work with care and accuracy the selected materials, also producing the more complex finishes.

Process control cannot be separated from the monitoring of environmental impact. Over the years, the company embarked on a path of pursuing and stimulating the principles of the circular economy.

FROM YARN TO THE FINAL PRODUCT,  
A SINGLE INTERLOCUTOR

STRENGTHS

# SERVICE AND ADVICE.

14

It's not enough for us to offer the best products on the market, we want to give more. Our knowledge.

The technical know-how, the continuous research and the production capacity allow us to develop high performance products and to provide a valuable advice.

From the type of tape to its dimensions, from the best material to the style that best matches the fabrics. Without forgetting the trends of the moment.

WE LOOK BEYOND TO  
STAY ONE STEP AHEAD

# SUSTAINABILITY.

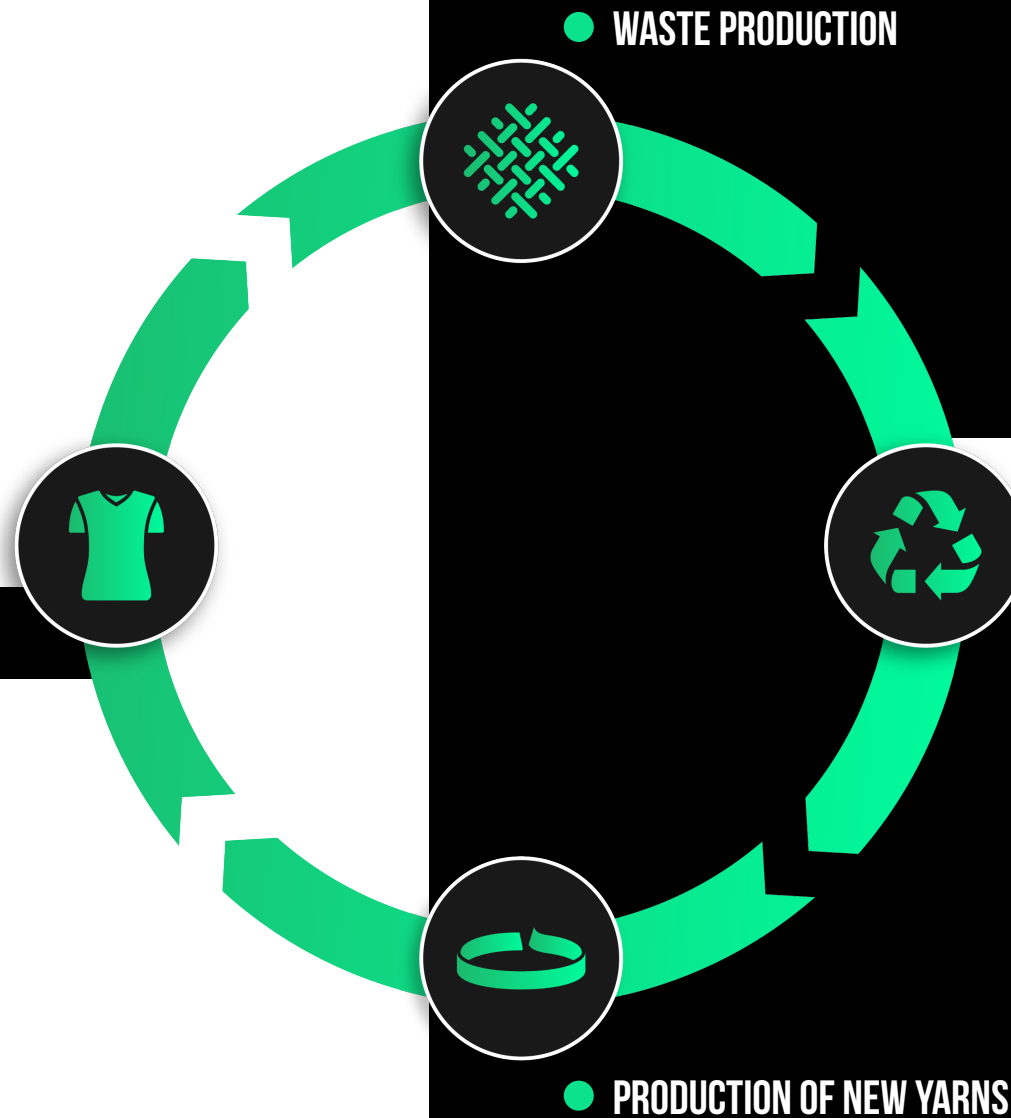

A COMPREHENSIVE COMMITMENT TO A CIRCULAR ECONOMY

From the yarn to the recycling of the scraps, going through the control of the production process. The manufacturing of a quality product can not ignore the environmental impact.

**1/3** OF OUR PRODUCTS  
**COME FROM RECYCLED YARNS**

Over the years the company has embarked on a journey of energy efficiency of all activities. 80% of the energy we use comes from photovoltaic systems, the remaining part is purchased from certified renewable energy sources.

Special attention during the production process is dedicated to waste. MARC gives new life to 1/3 of its products through the reuse of 100% of the waste from the production process. The waste that would normally result from the production process is part of a virtuous circle that leaves no room for waste.

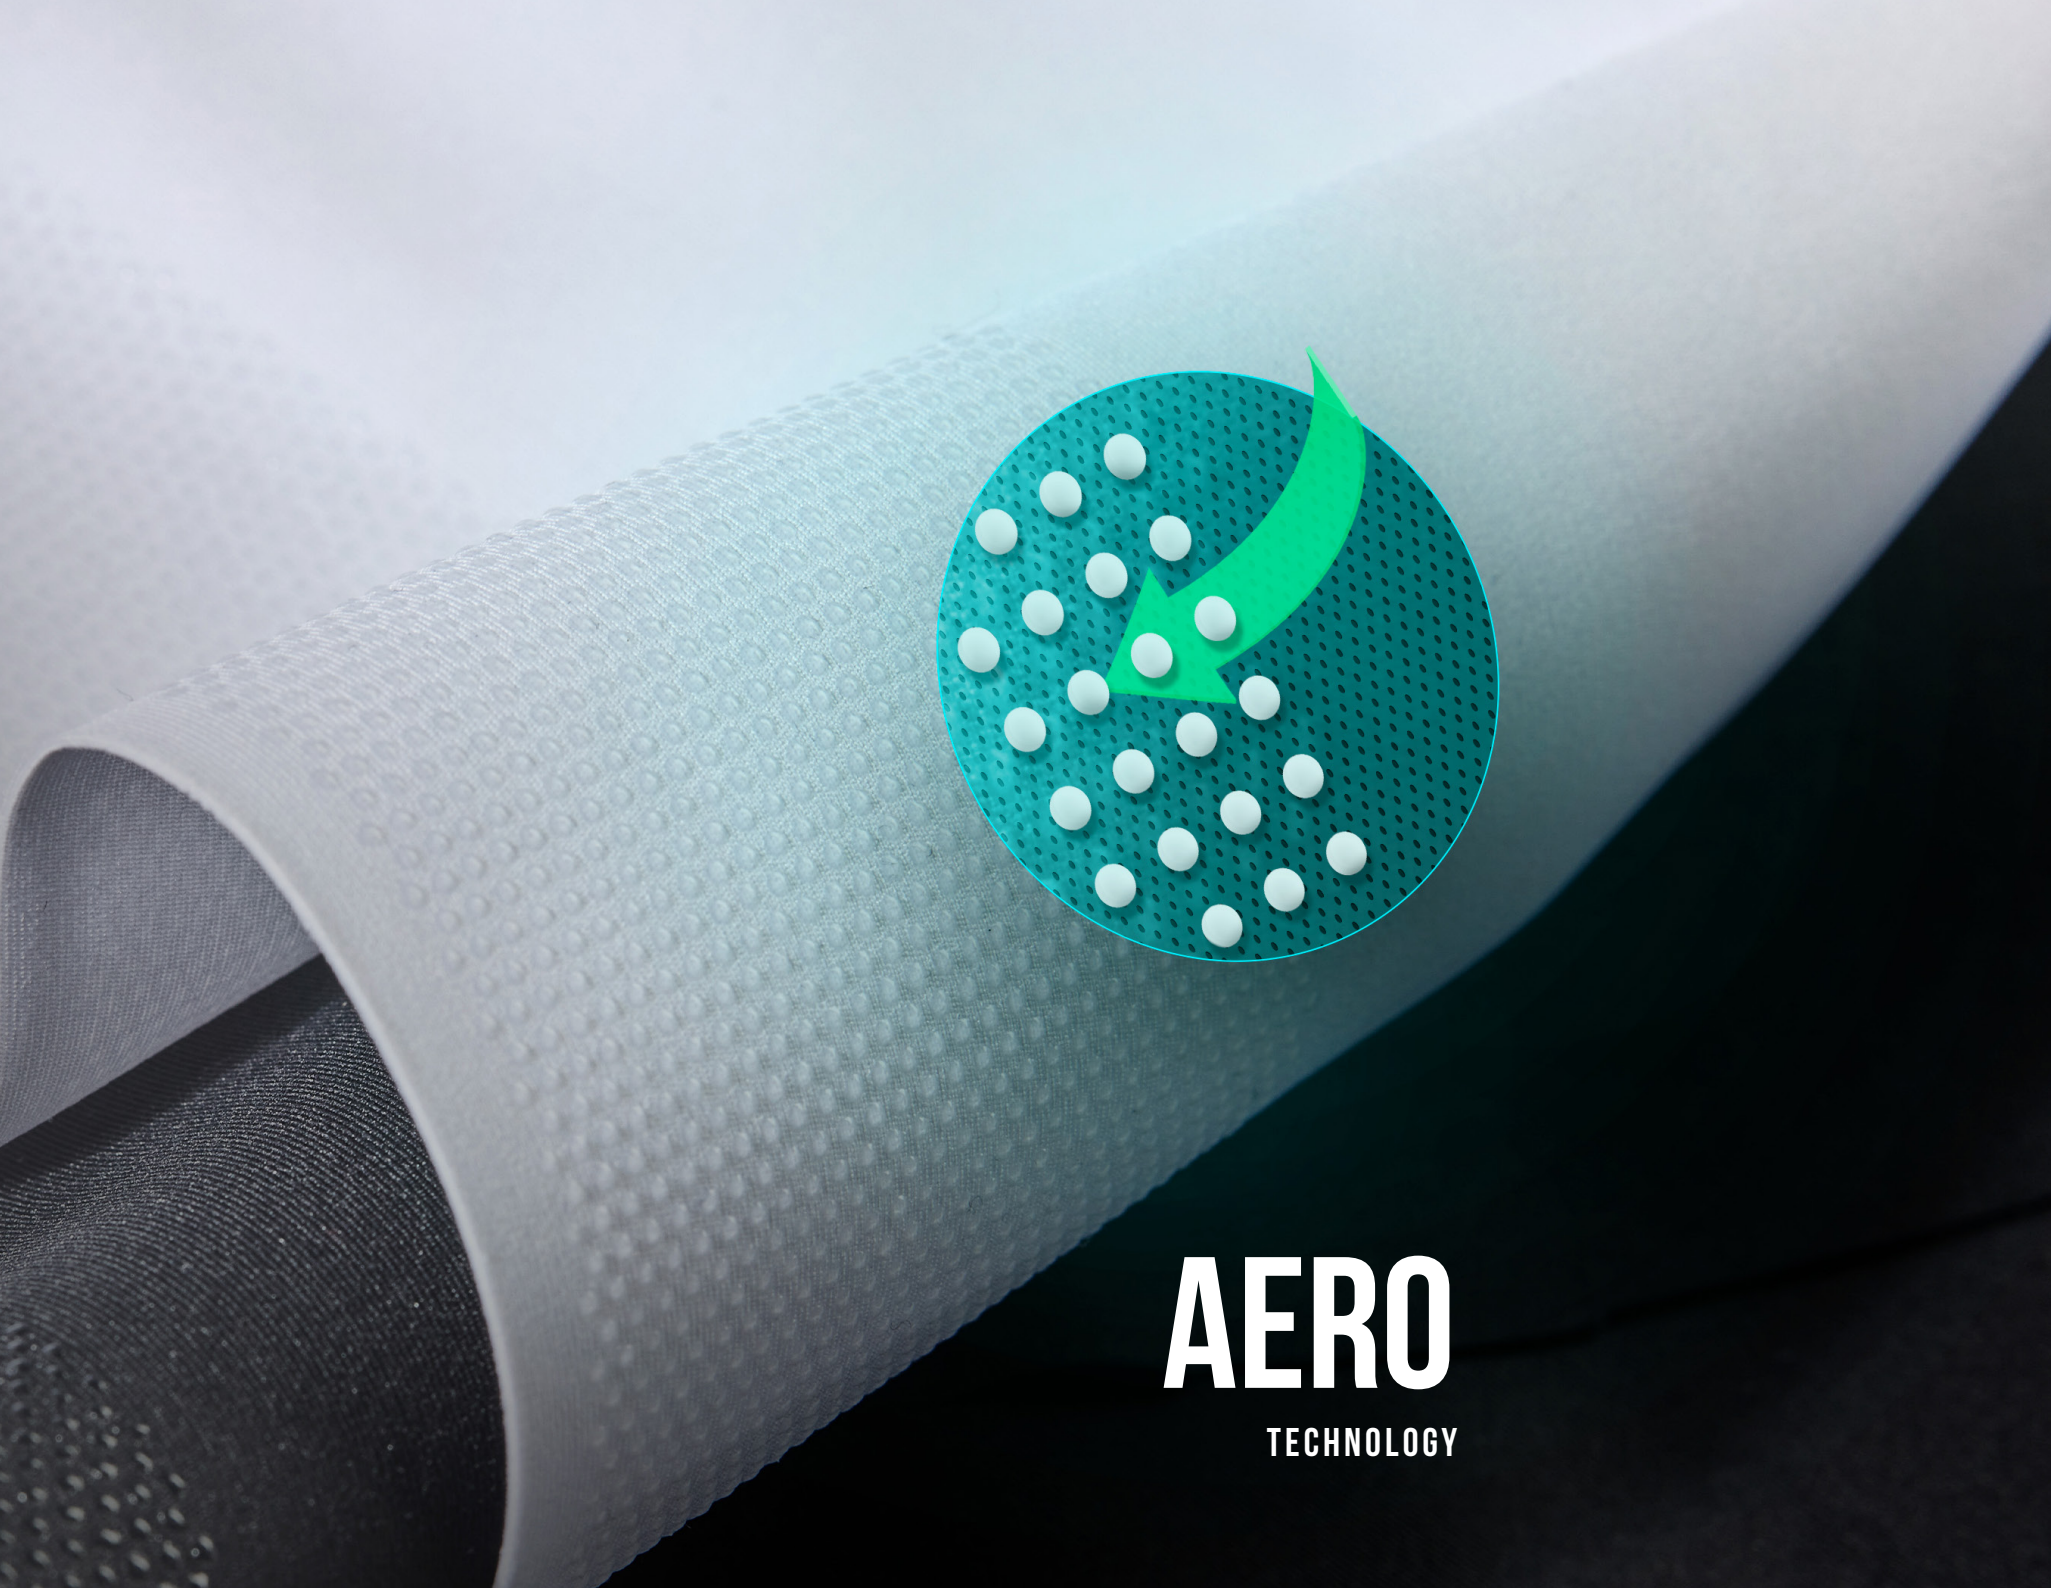

**100% OF WASTE IS RECYCLED**

FULL  
CIRCLE**

# MMAARROO

## **TECHNOLOGIES**

# AERO

TECHNOLOGY

AERO TECHNOLOGY

## SEAMLESS AREODYNAMICS.

To improve sports performance and to support every technical move, we have designed Aero. An innovative solution that combines the concept of tightness to aerodynamics in a single seamless product.

The continuous injection of silicone to the fabric allow maximum tightness and comfort thanks to the absence of seams. Our selected fabrics resist stretching, preserving its size and avoiding the rooling effect caused by the stretching action. There is a constant and uniform compression over all the muscle; adhering perfectly, the product support the muscle both in the tension and relax phases.

Continuity and the use of fabrics suitable for live cutting allow the improvement of the performance and the economy of costs, waste and intermediaries, optimizing time and storage of material.

COMFORT GRIP TECHNOLOGY

## MAXIMUM GRIP WITHOUT PREVENTING MOVEMENT.

22

In some areas the tightness of the garments is essential, but compression must not hinder movement.

The Comfort Grip technology combines a braking function with oxygenation to ensure maximum freedom of movement.

The silicone provides a braking and stabilising function, allowing the garments to hold even during the most concise and dynamic movements typical of sports.

The new chequered silicone distribution ensures correct circulation and oxygenation of the capillary vessels and muscles, preventing constrictions.

# COMFORT GRIP

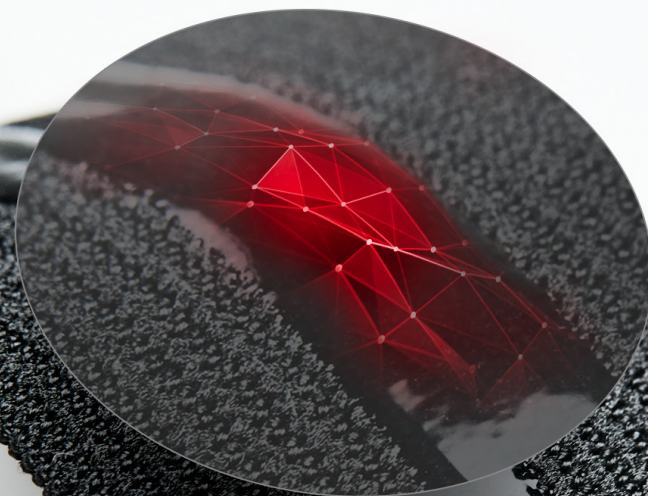

TECHNOLOGY

# STRONG SILICON

TECHNOLOGY

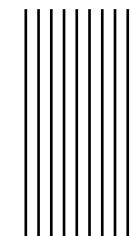

STRONG SILICON TECHNOLOGY

## COMPRESSION AND GRIP EVEN FOR EXTREME MOVEMENTS.

The Strong Silicon technology was developed for areas where the tape's hold must be particularly strong to ensure the correct ergonomics and functionality of the finished garment.

Thanks to the combined action of elasticity and silicone application, the Strong Silicon technology has an ideal seal for knitted and jacket bottoms. Silicone is suitable for contact with both skin and fabric.

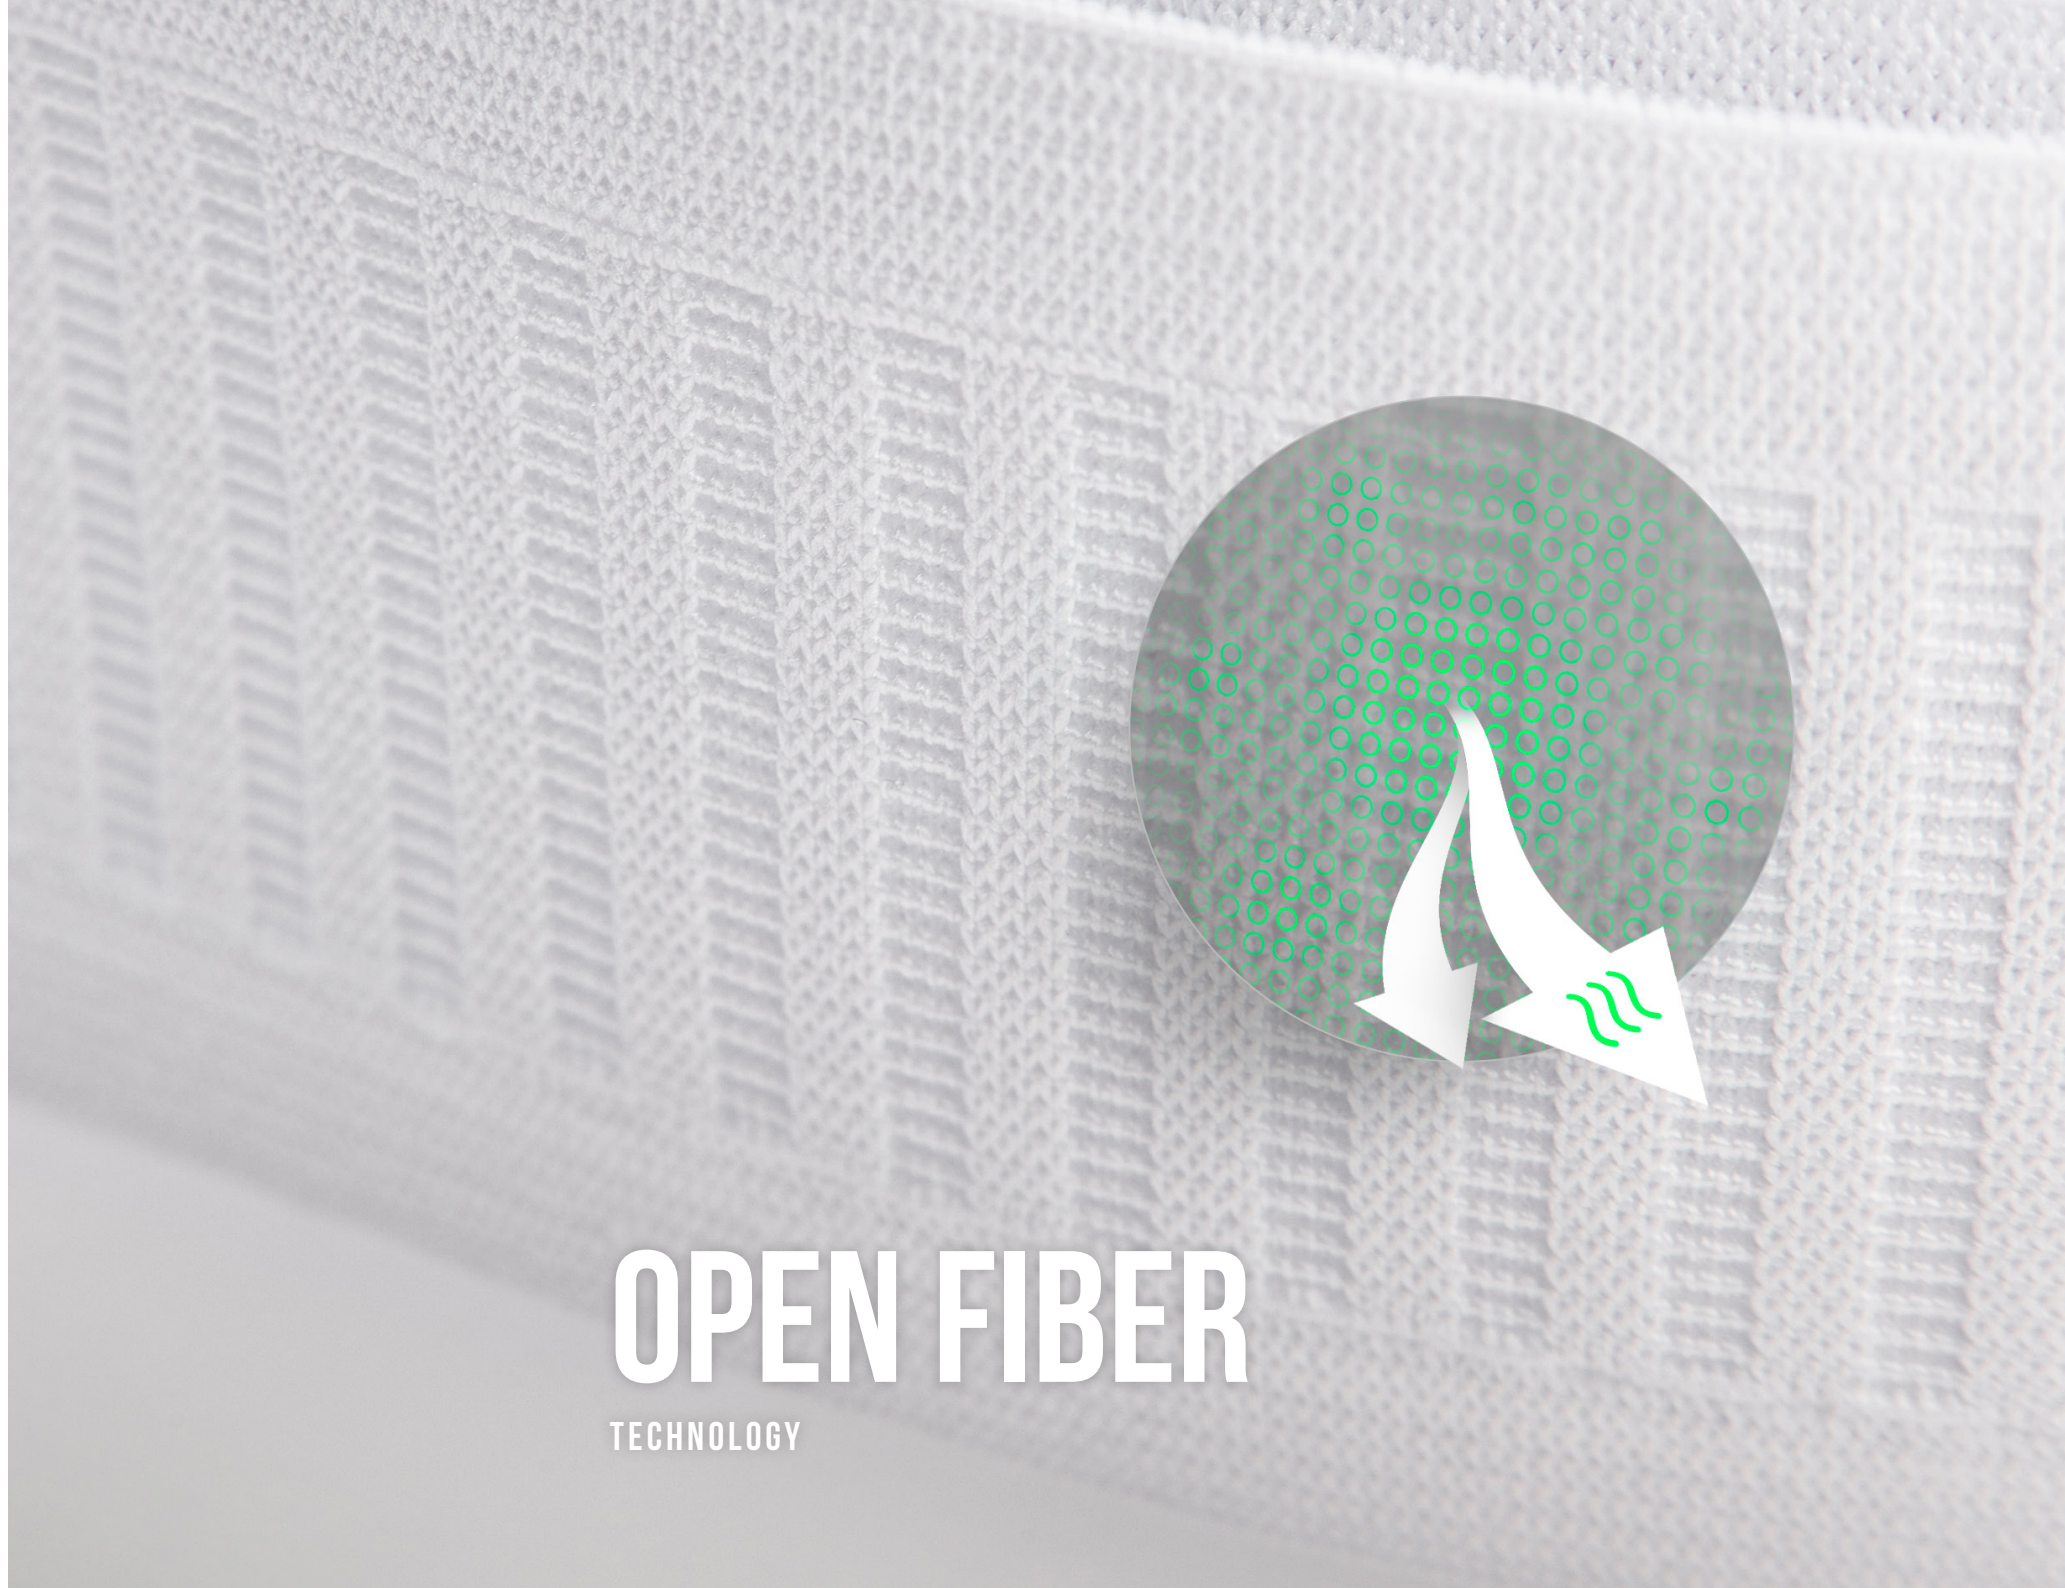

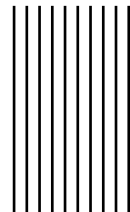

OPEN FIBER TECHNOLOGY

## BREATHABILITY WITH EVERY MOVEMENT.

The new Open Fiber technology is designed to allow proper breathability. Physical exertion and weather conditions can create perspiration. The compression of the tape can hinder the proper transpiration of the skin causing irritation.

The Open Fiber technology consists of an open knot structure, where each pull opening is created in the tape to allow breathability and thermoregulation.

# OPEN FIBER

TECHNOLOGY

# RE-LIGHT

TECHNOLOGY

## RE-LIGHT TECHNOLOGY

### HIGH VISIBILITY IN ALL CIRCUMSTANCES.

Re-light technology was developed to ensure maximum visibility in low light or dark conditions. Various solutions were designed to meet all requirements:

#### STRIPE

*Made up of one continuous reflective strip which, thanks to reflex technology, guarantees excellent visibility.*

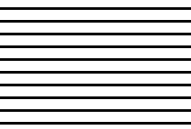

#### DECÒ

*Made up of split reflex segments that guarantee the stability of the tape without compromising elasticity.*

#### TIGÉ

*The chequered application of the reflex allows excellent visibility in all circumstances.*

These are just a few of the creations mentioned, as it is possible to customise the product by varying the height of the reflex for example, or by requesting special shapes such as your company logo.

**ENDLESS  
APPLICATIONS**

MARC FOR  
**SPORTWEAR**

MARC FOR **SPORTWEAR**

# THE PLEASURE OF NOT FEELING TIGHT.

**COMFORT**

**AERODYNAMICS**

**OXYGENATION**

We are born to shoot, to overcome obstacles.  
To run free, to soar, to cut through the waters.  
That's why we manufacture products able to make  
each garment even more performing.

We developed specific technologies that guarantee the tightness  
of the product and support the movements of the muscle in the phases  
of contraction and relax. We manufacture breathable, lightweight products  
that adhere to the body like a second skin guaranteeing comfort and  
aerodynamics because sports clothing comes from those who truly  
understand sport.

MARC FOR **FASHION**

## WHEN FASHION GOES ATHLEISURE.

Fashion calls for comfort and sportswear answers. From the experience gained in the sports sector, we approached the fashion world.

We start with comfort and performance to get to style and elegance. Styles, colours, sustainable materials and the flexibility of production are crucial elements in this sector and we support their demand thanks to competence and innovation. Thanks to the fusion of skills and the acquired know-how, we are able to meet the high fashion industry standards.

MARC FOR

WORKWEAR

MARC FOR WORKWEAR

**COMFORTABLE,  
PERFORMING,  
SAFE.**

**MARC FOR THOSE WHO  
WEAR US EVERY DAY.**

**BREATHABILITY**

**ANTIGRIP**

**REFRACTIVE**

**COMFORT**

**RESISTANCE**

**HOLDING CAPACITY**

We are where you wouldn't expect us to be. On top of a pylon, in the foundations of a building, inside an ambulance, in the kitchens of top chefs.

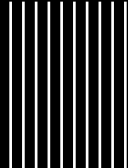

We are with the workers, supporting them against humidity, darkness, thermal and mechanical stress.

When it comes to workwear, the quality of the garment is crucial. This is where our knowledge of the workwear technical and functional properties comes into play. Compression when needed and controlled elasticity to allow freedom of movement in all conditions. Without forgetting aesthetic taste.

RESEARCH AND CARE  
OF THE SMALLEST DETAIL  
TO GIVE COMPLETENESS  
AND IDENTITY TO EACH GARMENT.
