

Welcome

The future is here

Green Side Fabrics

Business Model

Green Side Fabrics

Who we are?

Green Side Fabrics, of which I am the founder and current managing director, was created as the continuation of my work with new technologies in light industry and technical materials, which I have been concerned with since 1999.

Technical materials (knitted and woven fabrics, laminates) are a demanding sector. From the very beginning, my central aim was to establish cooperation with the best and most professional technological partners.

Without a doubt, the German company C.F. Weber, with which we have been working from the beginning, is precisely such a solid partner. Thanks to this collaboration, we continue to grow and expand our offer. Over the years, our hard and intensive work has brought about further growth and new partners like Climashield (Harvest Consumer Insulation), and recently, Advance Hitech Textile International Corporation. Of course, there is still the entire group of important suppliers and technological partners, which is too long to list here, but I would like to take this opportunity to thank all of them.

Everything is fine tuned so that our offer is cohesive, comprehensive and professional. So that collaboration with Green Side always gives our customers the feeling that they have chosen their supplier well.

Besides technological partners, the team of employees at the company is very important. Our activity is based on engagement and the desire to create, where every one of us feels "at home" and needed at every stage. Starting from the idea, through implementation, sales, logistics, and finally, customer service. Our team is made up of positive, passionate people who like what they do and often test certain solutions on themselves. Their successive creations and implementations drive them to act and reach ever greater heights as time goes on.

On our part, we always strive to operate based on a high standard of services, loyally and with the long term in mind, because this is consistent with our vision of the company and the "win-win" strategy. It is customers like this that we also like the most and invite to collaborate with us.

Green Side Fabrics

Who we are?

The Green Side Fabrics company unites professionals in one project.
The generations of the experience armed with the latest technology is using for meet the needs of customers
and to develop everything what they want.

CLIMASHIELD®
INSULATION INNOVATION

ADVANCE

CFWEBER
Textilien können wir

**Unique continuous
hollow fiber insulation**

Durable warmth, resistance for compression and many washes. The warmest synthetic insulation in the world

**Hi-Tech ultralight and
HT nylons textiles**

Perfect quality ultralight fabrics and down-proofs.
HT nylons, recycled and elastics for technical app.

**CORDURA
and technical fabrics**

180 years of the experience in technical app. CORDURA, strong reinforcements, recycled and coated items.

**Technical materials
and laminates**

Fabrics & knits for special requests, special properties, customization and tenders.

Main markets

Green Side Fabrics

Military - Police

Climashield insulation
Clothing,
Equipment,
back packs,
Vests, body armour,
laser cutting laminates,
Tents, hammocks, tarps

Outdoor - Sport

Climashield insulation,
Clothing,
Equipment,
sleeping-bags,
back-packs,
Tents, hammocks, tarps

Workwear - Safety

Climashield insulation,
Clothing,
Reinforcements,
Equipment,
Packing,
transport systems.
EN NORMS

Furniture - Industry

Abrasion resistance
materials,
Base fabrics
for further finish,
Special multi-laminates
even with metal mesh,
UV, FR, anti-cut, and
others protections

The technical fabrics are wherever special human-protecting parameters are required!

**That is the reason why sometimes perfect army solution is adopted to the outdoor, extreme sports or work wear
And the same is in the opposite way – special workwear standard are adopted by military, police or outdoor sector.
It looks like technical materials are everywhere!**

Green Side Fabrics – one step developing

From idea to delivery

Idea or need

When you find an idea or need – the process can start

Contact

Inform us about your idea or need. Your information our priority and is always safe.

Implementation / test

We will check and let you know what is possible, or not and why. Maybe we will have to re-work something together.

Production

After the first trials, tests and prototypes the production can start.

Delivery

Just after last confirmations we inform you about final delivery time and spedition.

**If there are no additional needs or requirements
– one idea brings our production process to the end**

Green Side Fabrics

Short Production Journey

Beaming

Preparation the yarns for concrete weaving, density & design formula.

Weaving

From 15D up to 3000D possibilities – program-mable density, structure & jacquards design.

Knitting

Single & double-jersey, pique, fleece, mesh, 3D spacer – all what you need, we can knit!

Dyeing & finishing

Teflon or silicone based finishes, but also fluorocarbon free technology.

Coating

PU, PA, PVC, anti static, FR, breathable, silicone rubber, foam, micro porous.

Calendering

The collection of ultralight and light fabrics with quality downproof finish.

Green Side Fabrics

Short Production Journey

Laminating

Films (PU, TPU etc), all membranes (PU, PES, PTFE, NANO), multi layers, laser cutting & FR solutions, foams.

Testing

Our EN 17025 labs use top-range machines for mechanical tests (tensile, tearing).

Testing

But also physical tests like air permeability, color fastness, washing resistances, Ret, Rct.

Delivering

We have many years of experience and regular partners who provide good logistic service.

Sewing

We can help you to produce your products in professional and experienced sewing companies.

Using

You can find our materials in a lot of professional products from skydiving, outdoor, special forces, extreme sports, climbing, workwear up to diving and industry.
