

ECOZ

RECYCLED NYLON & POLYESTER

- Recycled polyester made from PET (plastic) bottles
- Recycled nylon made from post-industrial/factory waste fibers
- Both recycled polyester and nylon fibers are GRS-certified

BIOZ-Compostable Polyester

- Under specific conditions, BIOZ fabrics are compostable, which means less trash ends up in landfills and the ocean
- Collection of worn garments by apparel brands is mandatory

PFC Free

- CRAFTTEVO fabrics with PFC-free DWR maintain a 80% performance rate even after 20 washes, creating a sustainable and durable garment with minimal environmental impact

SOLUTION DYE

- Reduce the use of resources such as energy and water, as well as cut CO2 emissions
- This method can be applied to polyester, nylon, and polypropylene fibers

SOLVENT MANAGEMENT

- CRAFTTEVO fabrics are dyed and finished at mills with strict regulations to protect the safety of workers and prevent environmental contamination

BIO-BASED NYLON

- Castor oil derived from castor beans is used in the production of bio-based nylon fibers, reducing the consumption of fossil fuels

What is ECOZ ?

ECOZ is CRAFTTEVO's environmentally friendly lineup of functional fabrics.
