

eVent alpineST

With over 20 years of experience creating high-performance membranes and laminates, eVent alpineST is a new sustainable alternative to ePTFE products offering top-end waterproofness and breathability.

alpineST combines high waterproofness with high MVTR designed for activities where weather protection is critical like climbing, skiing, backpacking and more.

Created with the planet in mind, alpineST products are built around a fluorine-free membrane laminated to recycled face fabrics and CO DWR.

eVent alpineST is available in an assortment of recycled face/backer combinations to keep you dry in the most demanding weather conditions for years to come.

Features:

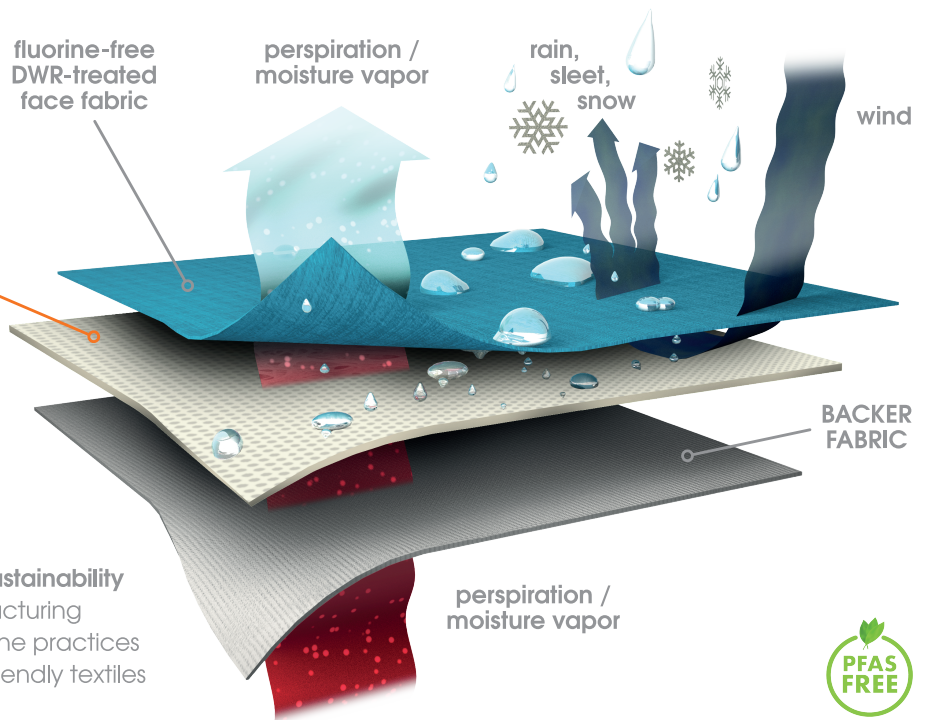

- Sustainable alternative to ePTFE. Fluorine-free.
- 100% waterproof & windproof
- Maintains high water column after wash
- High MVTR for active users
- 2.5L and 3L Laminates exclusively available from eVent

Laminate Specs:

WP (ISO 811) >25m water column
 MVTR 20,000 g/m²/24 hrs (JIS L 1099 B2)
 Laminate weight range (under development)

DIRECT DIFFUSION MEMBRANE
 Sustainable waterproof membrane that provides high levels of all-weather protection

eVent fabrics is committed to achieving sustainability and circularity in every step of our manufacturing process. From the materials we source to the practices in our production, eVent believes in eco-friendly textiles for a better planet.
