

About ALIC

Company Profile

Anhui Light Industries International Co., Ltd (ALIC), a state-owned foreign trade enterprise of Anhui Province, has scored annual total volume of 500 million US dollars and annual turnover over 3.3 billion RMB.

More than 400 foreign trade experts of our company headquartered in ALIC center, Hefei High-Tech Development Zone, secure the best service for customers at home and abroad.

We have specialized in export and processing trade of various light industry products, craftworks, chemical products and machinery & electronic products, involving textile garments, domestic utensils, shoes, hats, bags, suitcases, fittings, toys, gifts, stationery, kitchen supplies, sanitary wares, travel products, sporting goods, accessories of ships, lights, bikes, electric information and automobiles. Additionally, multi-layered businesses have expanded to over 160 countries and regions all over the world, coupled with sound cooperation with 3500 global partners and 8500 domestic suppliers. ALIC is also a well-known importer of various raw materials, medical apparatus, machinery and consumer goods.

ALIC has successively become a high-end product & service provider for world-class enterprises, institutions and organizations, such as Auchan, Wal-Mart, Shiseido, Airbus, Disney, UN Procurement Center, NATO, Carrefour, C&A, Burberry, Hugo Boss, Aldi and BMW.

The own brands of ALIC including "LILY", "Carefree", "Holiday", "FlyingCrane", "Happiness" and "EUROPA" have acquired renown in the world.

ALIC, with couples of international certifications, has been honorably awarded with AEO Certificate, AAA-Rated Customer of China Export Credit Insurance Corporation, China Quality Guarantee and Credible Enterprise, China Quality Guarantee and Credible Enterprise, Advanced Enterprise of Anhui Business System, Enterprise of Credit in Anhui Province, A-Level Tax Payer in Anhui Province, Provincial E-commerce Demonstration Enterprises and Civilized Enterprise Affiliated to Anhui Province.

History

Date History

- 2018.09 ALIC was honored as 'Key Cultural Export Enterprises' in Anhui Province
- 2018.06 ALIC was awarded export tax rebate enterprises of 'One Class' qualification
- 2017. 11 ALIC was awarded 'AAA+ Grade Client in 2017' by Sino-sure
- 2017.06 ALIC was awarded state tax of 'One Class Enterprises' qualification
- 2016.05 ALIC entitled as National Culture Export Key Enterprise in 2015-2016 Year
- 2016.04 ALIC awarded Top 50 of 2015 Year on total import&export volume in Anhui province
- 2015.07 ALIC was awarded "AAA+ Grade Client in 2015 "by Sino-sure
- 2015.06 ALIC was titled as Provincial E-commerce Pilot/Demonstration Enterprise
- 2015.03 ALIC was honored as "Incorrupt Culture Construction Pilot in Anhui Province
- 2015.02 ALIC was awarded"The 4th Civilized Unit among Provincial Enterprises"
- 2014.11 ALIC PASSED ANUUAL AUDIT OF OKOTEX.
- 2014.02 ALIC GAINED "CHINA QUALITY GUARANTEE & CREDIBLE ENTERPIRSES"
- 2013.03 ALIC gained Innovation Prize of the 23rd east China export commodities fair in March of 2013.
- 2013.01 ALIC was awarded as the winner of the best partner in 2012

ALIC Testing Center

Testing Center

Testing Center, in possession of specialized scientific labs concerned with textiles, garments, case& bags, is competent of conducting independent scientific tests through advanced testing machines for physic property tests on above mentioned products. Specifically, textile product testing lab is constituted of constant temperature and humidity lab, washing lab and ranking lab, where we can conduct tests of tensile strength, seam strength, colour fastness to washing, colour fastness to washing with soap, colour fastness to rubbing, down-proof, fabric weight, breathability, pilling resistance, abrasion resistance, rain, spray and water pressure.

Additionally, Testing center is able to conduct testings on above-mentioned items in strict accordance with standards at home and abroad including GB/T, ISO, AATCC, ASTM and present reliable testing reports.

Testing center is home to a professional team and its testers all have received training provided by professional third party institutions. At present, Testing Center has been certified by Shenzhen Centre Testing International, TVD SUD, Inspection & Quarantine Technical Center of Beijing Entry-Exit Inspection & Quarantine Bureau and Inspection & Quarantine Technical Center of Nanjing Customs. Later, it will get down to the certification by CNAS for a international qualification so as to provide ALIC and whole society with all-round, high-end testing services.

Physical-Mechanical Test

Our lab is equipped with the temperature and humidity control system. Certified professionals are hired to test the physical properties of the fabrics.

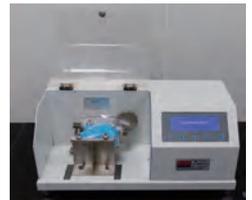

Tensile Strength Meter

Water Resistance Tester

Washable Color Fastness Tester

Down-proof Tester

Abrasion Resistance Tester

Rubbing Color Fastness Tester

Moisture Meter

Tearing Instrument

Dispenser

Light box

Rain Tester

Wetted Tester

Laboratory

A full set of electronic testing equipment can accurately measure all the properties of colors, helping us to develop products with popular colors and to provide customers with samples for comparison on different color settings.

Equipments

Factory

Our mill has the investment of 480 million RMB and covers an area of 120,000 M, including a construction area of 110,000 M. Besides, the annual capacity is 80 million meters of high-quality fabrics.

Our mill is an integrated manufacturer which is specialized in weaving, dyeing, printing, coating, membrane-making, lamination etc.

Main products: high quality woven & knitted fabrics, elastic fabrics, functional laminated fabrics, W/R breathable laminated fabrics, safe guarding fabrics, recycled fabrics etc.

Sustainable Management

ALIC sets up an Environmental Protection Department at the Head Office to integrate all the activities regarding industrial safety and environmental related issues. Measures relevant to resource conservation, energy efficiency, carbon reduction, employee safety, and other aspects of green products are designed, adopted, and promoted. Efforts to fulfill our social responsibility as a sustainable green business are exerted without any reservation.

Products

Casual&Function

Multi Yarn Dyed

ALIC to own a complete set of facilities and experience to provide customers with the most suitable products, whether stable fibers, synthetic fibers, or a composite woven with synthetic and stable fibers, weft stretch, warp stretch, or bi-stretch are elements for production.

Synthetic Yarn Dyed

Synthetic Yarn Dyed possesses the functional properties of synthetic fibers and the pattern changes in yarn dyed. Function-focused outdoor sports apparels, whether they are in checks, pleats, and a variety of texture.

- 100% Polyester Y/D for jacket
- polyester Y/D for Top
- Nylon Supplex Y/D

Shape memory

Shape memory fabrics feature their natural wrinkles and the ease to smoothen them out. In aesthetic, this series can be used to create a unique look of three-dimensional pleats.

Casual Look

- Denim Look
- Wash out
- Beachwear

Leather Like

--Suede

Suede with micro-fine fibers in a variety of weights can be used as fabrics for casual wear and accessories.

--Bright Light Leather

It's woven with various components and then processed to get a leather-like surface, which looks natural, soft, shiny and glossy.

Fancy Finish

We provides variety of extra-finish services.

Burn Out/ Cire / Crush / Drill / Emboss / Print / Sanding / Supersonic Quilt...

Products

Eco Green

Recycled Polyester

To collect used polyester materials, to melt, to remove impurities, to decolor, re-aggregate them into polyester raw materials, to turn them into fibers, and then to have the fibers twisted into yarns and woven into fabrics.

Organic Cotton

Organic cotton does not cause any harm to the land and human beings like what the planting of ordinary cotton would. It is also soft and delicate, breathable and moisture wicking.

PFOA/PFOS Free W/R

New environment-friendly C-6-type water repellents can not only repel water and oil but also comply with the EU laws that have completely banned the use of PFOS.

Bamboo

As bamboo fiber contains countless tiny pores on its cross section, the fabrics made of bamboo fiber are breathable and moisture wicking and provide natural antibacterial and decolorant functions.

Tencel / Modal

Both of Tencel & Modal are natural fibers, coming from plants which demand little water and land, and can be completely decomposed in the soil, resulting in no environmental pollution at all.

DL Cool

Cold natural minerals are added into nylon fibers during the early stage of processing. DL cool textiles are thus cool, dry, and light-weighted. When wearing DL cool textiles, you feel 1-2°C cooler than otherwise.

Products

Performance & Protect

Easy Move-Excellent Stretch

Using natural fiber/synthetic fiber/mixed blend, yarn dyed and piece dyed fabrics, DE LICACY produces a variety of elastic fabrics, by means of weft stretch/warp stretch/bi-stretch.

Mechanical Stretch-DLFLT

We have developed a twist yard, which can stretch naturally without adding in any stretch fiber. This mechanical stretch fabric has good dimensional stability, recovers to its original shape very quickly, and feels soft.

Nylon Cotton

Nylon itself has high tear stretch. Our products emphasize on the feeling of cotton. They feel soft and delicate but retain the characteristics of wearability, comfort, and durability. We have completely banned the use of PFOS.

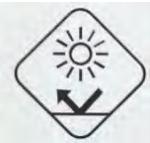

Wicking & Quick Dry (Ez-Dry®)

The design of three-dimensional wicking lining gives a soft touch. Even if the clothes are wet, your skin will not feel sticky and uncomfortable. Stay dry and comfortable whatever sports activities you are engaged in.

3D Double Weaving

Both of Tencel & Modal are natural fibers, coming from plants which demand little water and land, and can be completely decomposed in the soil, resulting in no environmental pollution at all.

Anti-UV

Made of titanium dioxide TiO₂ matt yard, which provides durable UV protection function in its own right and treated by finish processing methods to enhance UV function.

Wrinkle Free (Easy Care)

Whether it is natural or synthetic fiber, the wrinkle-free characteristics of the fiber itself make your clothes easy to handle. Otherwise, some finish processing on the clothes can also make "ease care" attainable.

Water Repellent

Surface of this fabric can repel water quickly, when water contacts surface of this fabric, it can effectively prevent water from penetration, keeping the fabric dry. After use, it dries fast, too.

Products

High Density(P.R.T)

Pass rain test to prevent moisture from penetrating from outside and to keep the down from exposing from within, this fabric is ideal for down jacket.

Feather Weight

Ultra-light weight of this fabric makes the garments easy to fold and to carry. It occupies less space and causes no burden. Tear strength can reach up to more than 800g.

3Layer Soft Shell

To combine the surface fabric, functional membrane, and lining. Surface fabric can stretch and stand wear; functional membrane is highly waterproof and breathable; inner lining keeps warmth. Need the use of PFOS.

2Layer Soft Lamination

To combine the surface fabric and functional membrane to make garments which are windproof, water-repellent, and breathable. We provide a wide range of designed surface fabrics.

2.5Layer

The 2.5-layer products made by a special technology have not only the functionality of two-layer lamination but also beautiful prints on the inner membrane surface.

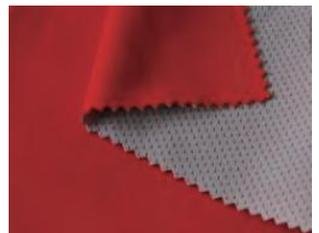

2Layer Bonding

It's free to bond different materials of various thickness and weight to combine the windproof and water-repellent characteristics of the outer layer with the warmth-keeping function of the inner layer.

Function Coating

PU or Acrylic resin can be coated on the surface of fabric so that the fabric can be made waterproof, breathable, and windproof. Surface of its garments is shiny, soft, thin, and noise-less.
