AN ITALIAN STORY

A STORY OF PEOPLE

Tiba Tricot Srl is a company specializing in the manufacture of warp-knitted fabrics, 3D fabrics and **circular knitwear**. Tiba Tricot started in 1962 at the initiative of its founder, **Antonio Brugnoli**, who started to manufacture warp-knitted fabrics on behalf of third parties with the first three German Raschel looms in the facility in Sacconago. All our fabrics **are manufactured only in Italy** with dedication and care guaranteed by over 50 years in the business. What was once a family business is today a solid and structured company that has known how to **make its business vision evolve**, but without ever betraying its own true identity, which is deeply rooted in the people who live it every day. **Unity, cooperation and participation** are the soul of a group that has always known how to look far ahead, **innovating in tradition and in the solidity** of its relationships.

For all these reasons, when we have to define who we are, we have to talk about the key factor that has forged our identity: **we are a family**.

ADVANCED

FABRICS

CONSTANTLY EVOLVING.

From year to year, technologies and commercial strategies have been in **constant development**, but each generation has fostered those human values that have distinguished us and are a source of pride **still after 50 years in business**. For Tiba Tricot, **innovating means daring**, choosing complex little travelled routes that are however always beautiful and give great satisfaction.

INNOVATION IS NOT A MIRROR DETAILS

Quality and innovation, inspired by deep and constant analysis of needs and market changes, have rung in the changes in the evolution of the company over the years. For us, **innovating means listening, experimenting** and, most importantly, **being at the cutting edge of the latest technologies available**, owing to which we are able to ensure a high performance product. The Tiba Tricot strategy is **the pursuit of perfection every day**: rising to that challenge has enabled us to weave high quality yarn for over half a century.

1972

Being able to count on about thirty years of looms, the company moves in its current headquarters in Castellanza.

1982

The Company becomes a joint stock company under its current name.

1998

The first loom is purchased for 3D spacer warp-knitted weaving.

2004

Tiba Tricot obtains ISO 9001 certification.

2005

Leadership of the company is handed over to the current Chairman, Giovanni Brugnoli, the founder's son.

2012

Tiba Tricot Srl takes over the activities of the historic Miltex Srl.

2019

Same identity, new image. Tiba Tricot weaves a new chapter of its story.

TWO FABRICS TWO WORLDS

KNITWEAR DIVISION

Since 2011, we have expanded production with fabrics used in different sectors, **from sport and fashion, to underwear and beachwear**. We have also complemented them with **new antibacterial fabrics** that are specifically designed for the medical and hygiene fields. Tiba buys its yarns from reputable suppliers and the fibres used range from synthetic fibres (polyesters, nylon) to cotton, modal fibres, viscose and wool.

WARP-KNITTED FABRICS DIVISION

Tiba Tricot manufactures a vast range of warp-knitted fabrics for different sectors like the **technical and sporting clothing, footwear, automotive, contract** and other industries. The catalogue also includes innovative fabrics made with **bacteriostatic technologies**, for the entire medical field. From traditional warp-knitted fabrics to a vast **collection of 3D spacer fabrics** for various uses. Tiba Tricot works with a wide range of customers to meet the most demanding standards in terms of appearance, surface finishes and compliance with technical parameters

TEXTILEOLOGY

THE ITALIAN SCIENCE OF TEXTILES

Tiba combines the Italian tradition of knitwear with research and innovation to create a high-quality product at the forefront of performance.

For today's needs and tomorrow's vision.

LINES OF PRODUCT

GLOBE

IT'S NOT ART
IT'S SCIENCE.

GLOBE WARP-KNITTED AND CIRCULAR FABRICS CREATE A LINE THAT INCORPORATES MANY USES.

We provide 3D spacer interior covers for the automotive sector that have been tailored to customer needs: **fabrics for cladding, door panels and helmets** (for motorcyclists, skiers and cyclists). We provide optimum solutions for all the needs of the sector child care: car seats, push chairs, buggies, carrycots. The **highly breathable 3D spacer fabrics** are also suitable for perimeter strips for mattresses, volumetric 3D side bands, linings and internal coverings. Our Globe fabrics can become furnishing elements and so much else.

"Flame retardant" fabrics for the "contract" market, fabrics that can be Velcro-coated to be bonded with wadding or MTP for filling sofas and armchairs, fabrics for lamination and for the footwear industry.

In order to contribute to prevention and protect our products, we have expanded the range to include different products made with the latest generation of bacteriostatic yarns for the medical and sanitary sector.

SMARTLOOK

SMARTLOOK FABRICS ARE DEDICATED TO THE WORLD OF FASHION AND UNDERWEAR.

We manufacture **warp-knitted fabrics made of synthetic fibres** (charmeuse, perforated and mesh fabrics), **circular fabrics made of natural fibres** (jersey, interlock, ribbed and jacquard) **and printed fabrics** (ink jet and cylinder). Elegance, colour, imagination and comfort are the main characteristics of these fabrics designed for high **fashion, techno fashion, lingerie and underwear**. We create fashion through innovative yarns displaying all the quality and style of Italy.

Tactile sensations that focus on personalization and wellbeing.

—
**IT'S NOT ELEGANCE.
IT'S ATTENTION TO DETAIL.**
—

DYNAMO

—
**IT'S NOT JUST FORM
IT'S PERFORMANCE.**
—

DYNAMO FABRICS REPRESENT ENERGY, DYNAMISM AND RESISTANCE.

They are **circular and warp-knitted fabrics for sport** that are high-performance and breathable to ensure maximum comfort in the most extreme situations. We make technical fabrics for **running, cycling, rugby, football, basket ball and all other individual and team sports**. Warp-knitted fabrics (perforated, mesh, plush) and circular (jersey, interlock and tubular) for knitwear, trousers, jackets and accessories. We provide solutions for technical sportswear through linings, mesh and 3D fabrics for motorcyclists. Dynamo fabrics are also PES/PA circular fabrics with specific technical characteristics: **wicking away humidity, "cool touch", carbon, FIR, neoprene, polypropylene and transparent and impermeable membranes.**

PRO

**PRO YARNS ARE HIGH-PERFORMANCE YARNS
FOR ALL TECHNICAL AND TECHNOLOGICAL
APPLICATIONS.**

We provide optimum solutions for **applications for the industrial sector**: automotive, child care, footwear, abrasives, helmets, luggage, mattresses and digital printing. Performance, personalization and precision are the main features of these high-performance fabrics for all **technical and technological applications**. Warp-knitted fabrics for hook-and-loop fastening, satins that can be Velcro-bonded for paper and abrasive cloth supports and technical fabrics for abrasive discs.

Setting new records for professionalism and achieving excellence.

—
**IT'S NOT STYLE
IT'S TECHNOLOGY.**
