fabrics with certified
recycled materials.
Performance wear
breaks new ground.

ARQUAS 6.0

ARQUAS 6.0

Bending the rules, changing the game.

ARQUAS™ is the innovative **fabric platform** by ISKO™, combines the company's expertise in **woven technologies** with sportswear and activewear innovation to change the game in the sports industry.

The collection is designed in three lifestyles: **active, outdoor, club sports.**

ARQUAS 6.0 covers the entire spectrum of ISKO™ technologies and combines them with a broad range of performance properties, such as moisture management, UV and wind protection, heat retention, water and stain repellency.

The new collection features **35 brand-new fabrics** and focuses on responsible innovation. Most of the fabrics are made using recycled polyester and organic natural yarns. ARQUAS 6.0 shows the whole spectrum for a sports fashion that combines **function and style**: Glitter and shiny finishes, first time the use of Nylon, fabrics with an extremely soft touch and durable recycled yarns, super light woven fabrics and cozy outdoor fabrics, seamless knits, reversible and packable styles, and fabrics with 4 way stretch like ISKO Blue Skin™ for a 360° elasticity.

RESPONSIBLE INNOVATION™

All products, from traditional denim fabrics to patented technologies, are the result of ISKO's Responsible Innovation™ approach, which consistently defines new industry standards.

- ISKO™ creates the **Product Category Rules (PCR)** and is the first denim manufacturer who achieved **Environmental Product Declarations (EPD's)** providing the water usage and carbon footprint of 1 square meter of fabric.
- Member of **Sustainable Apparel Coalition (SAC)** and full verified **Higg Index Facility Environment Module (Higg FEM)** evaluating their total life cycle from raw material to waste/recycling.
- Signatory member of **ZDHC Foundation, Textile Exchange** and **SEDEX**.
- ISKO™ has an **Environmental and Chemical Management System**.

ACTIVE

Ideal for a wide range of sports from yoga to fitness to running. Whether participating in high- or low-impact activities, these fabrics perfectly fulfill the technical requirements of athleisure and performance-wear apparel.

OUTDOOR

Fabrics that stand for superior comfort, durability, water repellency and breathability, protecting the wearer from the elements of nature in any kind of setting.

CLUB SPORTS

From the perfect golf swing to a wild horse ride, essential features such as maximum flexibility, fit and performance make these the ultimate textile concepts for the sportswear market.
