03

Innovation

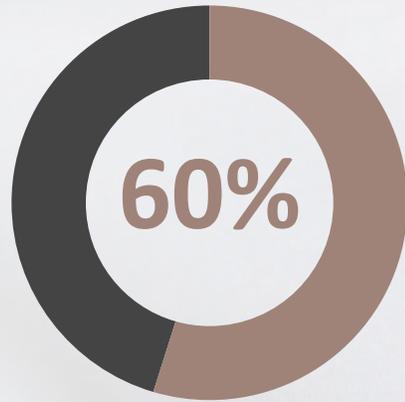

One Future collaborates with domain experts from different fields of our manufacturing processes, which enable us to collectively bring about possible solutions through a variety of elements.

200

**New Items
per year**

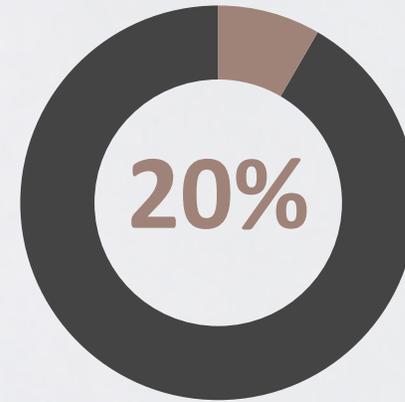

Proportion of Innovation Type

Conceptual Developments

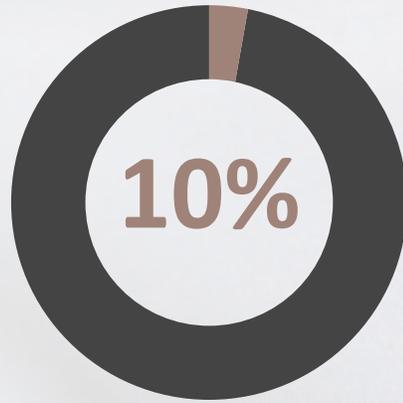

Ideas for new developments come through our everyday activities, such as; body movements, climates, level of comfort. We are then able to conceptualize these practical experiences into fabrics.

Partnership Developments

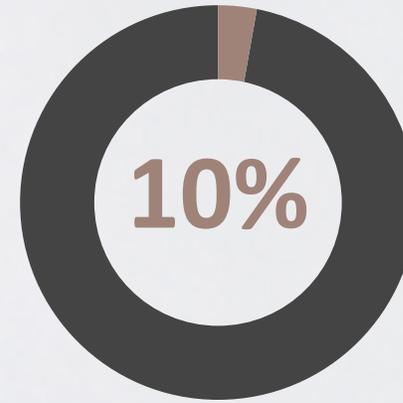

This is where we collaborate with our suppliers or buyers to bring about their ideas. Delivering new fabric technologies and innovations ahead of the market trend, fulfilling our partner's wishlist.

Proportion of Innovation Type

Counter Developments

This is a service that we offer to our buyers. As an alternative source of supply, we need to accurately replicate the fabrics in a timely manner to be able to meet market needs.

Continuous Fabric Updates

In order to keep up with market demands, we tirelessly continue to review and improve our past developed fabrics to give our buyers better value-for-money product.
