

Customized Jersey Specialists

Utenos
Customized Jersey Specialists

Customized Jersey Specialists

We're a client-centered certified jersey producer with two main fields of expertise:

READY-TO-WEAR PRODUCTION ON DEMAND and JERSEY FABRICS (DEVELOPMENT & MANUFACTURING)

Our vertical integration brings clients the benefits of having the full production cycle under one roof.

Fabrics

Ready-to-wear

Focus and values:

Sustainability is part of our identity and sets us apart on the market. We aim to please conscious consumers with innovative jersey fabrics of excellent quality.

In business since 1967, we're now the biggest jersey producer in the Baltics and Central-Eastern Europe. Our team of over 1 050 in-house factory workers, modern textile professionals and international managers is committed to delivering top quality, on-time, with superior customer service.

Key facts:

- The biggest jersey producer in the CEE region
- Full vertical integrated of production
- A CEE leader for innovative manufacturing
- Fabric production from almost any fiber
- Established: 1967
- Listed: NASDAQ
- Employees: 1 050
- Subsidiaries: Šatrija, Gotija, Aboutwear, Mrija (Ukraine)
- Auditor: EY

Capacity and experience:

We're able to produce over 9 million meters of fabric and over 3 million ready-to-wear items a year. And with more than 50 years of experience in the industry, we have the expertise to innovate to meet clients' specific needs. Both well-established and emerging fashion brands rely on our flexible solutions for medium and large-size orders of any complexity.

Our approach:

As a socially responsible producer, we conduct business fairly and always ensure the safety of our employees. We're dedicated to sustainability and environmentally friendly practices, and seek to contribute to the development of our local community. We also respect our clients, safeguarding their intellectual property and business secrets.

Quality is a key focus

Quality control is one of the cornerstones of our company's priorities. Through close monitoring at all stages of the production cycle, we ensure high quality products which fully meet the strictest requirements of our clients.

Quality control starts from the selection of the yarn which meets the highest standards. We inspect each meter of our knitted fabric. We then inspect the fabric several more times during the dyeing process. At the cutting unit we inspect the quality and compliance of the cut garments and once again the quality of the fabric. Before sewing the garments our seamstresses verify the quality of the cut garments and the fabric. Each sewn garment passes the quality filter to comply with the top standards. So customers receive a product whose compliance at different stages of the production cycle has been checked 7 times!

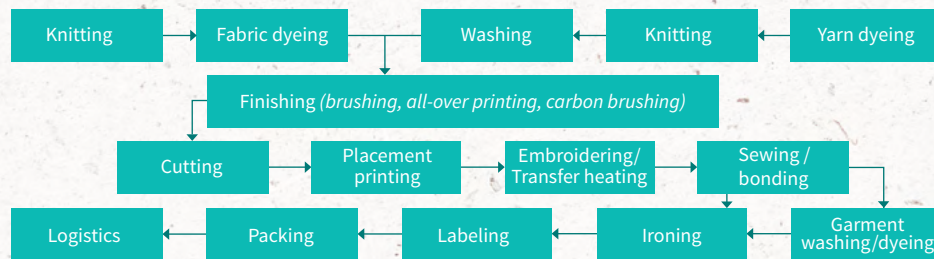

R&D on Demand

Thanks to vertical integration, we can offer a full production cycle under one roof. It starts with more than 50 circular jersey knitting machines, followed by fabric and yarn dyeing machines. Finishing machines enable brushing,

piece and all-over printing options (including digital), and embroidery and heat transfer. Plus we have automatic cutting machines and modern sewing equipment, and offer fully fashioned garment dyeing and washing.

EVERYTHING UNDER ONE ROOF Shorten Your Supply Chain

Design Department:

Our team of 30+ experienced fashion designers and construction and fabric technologists

is ready to assist you in creating your company's collection or resolving any technical issues.

Fabrics/Fibers: Capacity

YARNS AND THEIR BLENDS

Cotton	Bamboo	Polyamide
Wool	Hemp	Polypropylene
Linen	Viscose	Tencel
Silk	Modal	Polyester

TYPES OF YARN

Regular	Pima
Organic	Gassed Mako
Recycled	Mercerized
Melange	Compact
Slub	

TYPES OF FABRICS

Single jersey - gauge 16E to 32E
Rib 1x1, 2x2 - gauge 15E to 20E
Interlock - gauge 24E to 28E
Jacquard - gauge 18E
Fleece - gauge 20E

YARN DYED STRIPES KNITTED FABRICS

Engineering stripes

Single jersey - gauge 28E
Rib - gauge 18E

Feeder stripes

Single jersey - gauge 16E to 32E
Rib 1x1, 2x2 - gauge 15E to 20E
Interlock - gauge 24E to 28E
Jacquard - gauge 18E
Fleece - gauge 20E

PRINTING

Digital printing

No color limits
On natural fibers: cotton, linen, wool, viscose and modal.
Up to 600 dpi x 600 dpi resolution

Placement prints (up to 14 colors)

Pigment, lack, transfer, puff, discharge, glitter, pearl, flock, foil, burn out

All-over prints

(flat-screen, 6 colors max)
Pigment, burn out, lack, discharge

ADDITIONAL FEATURES

UV Protection	Aloe Vera	Quick dry
Flame retardant	Bees Wax	Antipilling
Water resistant	Silk Proteins	
Antibacterial	Silver Ions	

CAPABILITIES

- > 9 million meters of fabric / year
- > 3 million units of clothing / year
- 8 000 different fabrics can be made
- 80 tonnes of fabric dyed per month
- Total of 55 knitting machines in house

Fabric Development and Production

Library of fabrics:

Organic and conventional cotton, wool and wool blends, thermo, hemp, linen, tencel, viscose, modal, bamboo: we're able to offer some 8 000 different knitted fabric designs.

Material on demand

With our Monarch, Mayer & Cie, Orizio, Vignoni, Terrot and Marchisio knitting machines, we're able to create plain dyed and printed as well as yarn dyed stripes knitted fabrics. Production of a new fabric can take as little as 2

weeks from the time an order is placed.

TestLab:

As the region's largest knitted fabric producer, we've set up several laboratories for testing to ensure the top quality of our products. We offer fabric testing services on demand, according to industry standards. Clients can request tests from the list of those we provide for any fiber or fabric, prior to production or for research purposes.

Committed to the Environment

Becoming Organically Innovative

We've always worked to be an organically innovative producer, and certifications and awards attest to what we've achieved. We were the first Lithuanian company to introduce the Social Accountability Standard SA8000. Our products are certified as both OCS 100 and OCS Blended, attesting to the use of organic cotton in their manufacturing. And we also have Global Organic Textile Standard (GOTS) certification, a mark of compliance with ecologic standards that's recognized worldwide.

Greenpeace Textile Procurement Standard

In 2020 Utenos Trikotažas became the first textile producer in the world to fully comply with Greenpeace's environmental standards. The environmental organization then started

to produce its own textile collections at the Lithuanian company, making Utenos Trikotažas the only place on earth where Greenpeace's collections are made.

European Business Awards 2019

Utenos trikotažas was named 'National Winner' in the 2019 European Business Awards (Social Responsibility and Environmental Awareness category), one of the world's largest business competitions. Adrian Tripp, CEO of the European Business Awards said: "This is a significant achievement and Utenos Trikotažas is an outstanding leader in their field. To be chosen as a National Winner means you show great innovation, ethics and success and are one of the best businesses in Europe".
