

Outdoor is our passion. Whether in the mountains, the wilderness, in faraway countries or in the countryside on your doorstep, Jack Wolfskin offers all the products you need to make you feel right at home in the great outdoors, whatever the weather. With your help, we want to continue to stand out from the crowd as a brand for perfect outdoor equipment: customer-focused, friendly and with a passion for the great outdoors. Join us as a

Fabric Developer (m/f/d)

Your challenge!

- Handle and manage development of fabric and technology concepts based on business requirement including fabric data library maintenance and quality testing & approval
- Work with suppliers to ensure that the required development timeline is maintained
- Obtain and assess price quotations with product engineering team
- Communication and interaction internally with all product functions and purchasing
- Optimization of the development process in close collaboration with relevant development functions
- Maintenance of inhouse product documentation of new fabric developments for sales and communication
- Collaboration on go-to-market concepts of new fabric developments and features
- Support in project related working groups
- Business travel for fabric sourcing, to fairs etc.

Your DNA for JACK WOLFSKIN:

- Degree in textile design, textile engineering, product management or similar with a minimum of 3-5 years professional experience in a comparable position
- Good knowledge of production processes
- Technical product knowledge (especially on functional outdoor products)
- Experienced in assessing product quality and also the capabilities of vendors
- User knowledge of English written & spoken, Microsoft Office and a product management tool
- Organisational strength and good communicator
