

Tintex shows new fabric collection at Performance Days

10
Nov '17

Tintex, a leading contemporary fabrics maker of naturally advanced and responsibly crafted jersey fabrics designed to activate the contemporary fashion, sports, and lingerie markets, is presenting its latest high-tech fabrics at the ongoing Performance Days expo. The global sports event is being held on November 8 and 9, 2017, in booth 639, in Germany.

Tintex collection counts more than 80 new qualities and style designed to fit the sportswear, athleisure, fashion and innerwear sectors, divided in three focused jersey fabric concepts: Timeless, Fashionable, Innovative.

The company is presenting its new and fresh campaign with contemporary images that signal the launch of the Autumn Winter 2019 Jersey collections. The Tintex collection uses at least 60 per cent of more sustainable materials such as Tencel, organic [cotton](#), natural organic linen, Ecotec by Marchi & Fildi, the smart cotton from pre consumer scraps that saves up to 77,9 per cent of water.

For the first time at Performance Days, Tintex presents unique developments made with the Roica Eco Smart family, a clear, innovative leader in premium eco-sustainable stretch fibres with proven credentials for market savvy choices that meet contemporary business needs and consumer desires. Within this family, Tintex has selected the world-first GRS certified Roica premium stretch yarn that comes at least 50 per cent from recycled pre-consumer

waste.

The company is showing B.Cork, the fully commercialised, unique technology that sources pre-consumer certified waste from Sedacor with a patent pending hi-tech lamination of a new water based, formaldehyde, and solvent free coating for a breathable, natural and waterproof supersoft. B.Cork can be applied to both knits and wovens, and works with all current Tintex smart fibre bases.

BCI cotton brushed fleece is also displayed. It has a sophisticated iridescence, obtained by a water based, formaldehyde and solvent free coating for a water, oil and stain resistance with breathability anti-bacterial moisture control.

Three Layer Outershells, a naturally thermal layer system with surprising colours and laminated surface effects, is also a part of the show. It is wind and water proof, breathable, anti-bacterial, with odour control, moisture management and quick dry performance.

Luxurious base layers in extra fine gauges with improved breathable and thermoregulating performance combined with moisture control, for the womenswear luxury athleisure market is also displayed.

Poetic and futuristic jerseys, using BCI cotton, with a sensory touch and UV sensitive prints on an advanced water based, formaldehyde and solvent free coating for a sparkling reflective touch is shown. (GK)
