

Looking forward to the next PERFORMANCE DAYS

By Editorial staff

From April 27 to 28, 2022, the industry will finally get together live at the exhibition center in Munich, Germany.

Get-together of the industry on April 27th and 28th in Munich! © Performance Days

Trade fair visitors can look forward to personal exchange, intensive networking, exciting material innovations, an extensive program of expert talks and much more. The PERFORMANCE DAYS takes place as a hybrid event in order to provide the opportunity to follow the fair online.

There will be a portfolio of more than 175 international exhibitors highlighting their latest functional textiles and fabric innovations at the event venue. A further 100 digital exhibitors can be accessed during the fair via the digital platform PERFORMANCE DAYS LOOP by means of interactive communication tools at <https://www.performancedays.com/exhibitor-list.html>

The sourcing platform PERFORMANCE DAYS LOOP also allows brands to keep up-to-date before and beyond both days of the fair in terms of latest news, top market activities. Discover the latest material trends in the Marketplace already today, feel free to filter them according to your individual needs, view them in 3D, let yourself be inspired by Material Stories, contact the exhibitors and simply order free samples!

Focus Topic until 2023: Together "On the way to CO2 neutrality" © Performance Days

With the April's Focus Topic, a roadmap being introduced over the course of the next three fairs climaxing in April 2023: "Our Journey to Carbon Neutrality" to accompany exhibitors on their way to climate neutrality.

The curated highlights of the outstanding PERFORMANCE FORUM are already accessible online, providing an inspiring and in-depth overview of the latest materials, trends and innovations: <https://www.performancedays.com/performance-forum/fabrics.html>

Branch experts and insiders and specialists will present sustainable innovations, developments and new technologies in stimulating panels and expert talks, including a livestream:
